## Customer Tech Center and Factory Tour

Visitors Guide

# Welcome To LayerZero Power Systems, Inc.

The LayerZero Power Systems corporate headquarters and factory tour is designed for critical facilities professionals enjoy and learn what's inside the world of LayerZero.

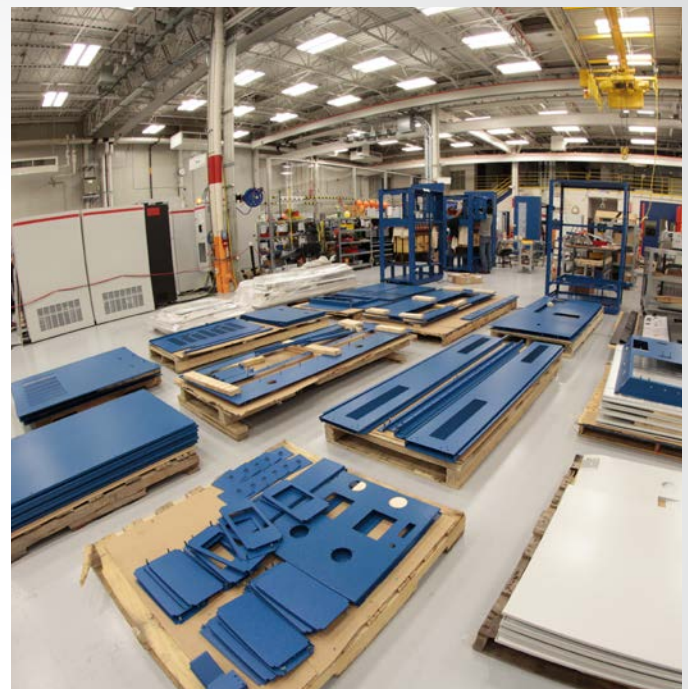

## LayerZero Power Systems Factory Tour Overview

We take such extreme pride in the products we design and build that we provide guided tours of our world-class, state-of-the-art production facility.

As a visitor on the factory floor, you will see how LayerZero products are fabricated, assembled, and tested.

LayerZero Corporate Headquarters Visit Highlights:

- LayerZero product suite overview
- Overview of LayerZero processes (eBOSS)
- Product showroom interactive demonstrations
- Tour of product manufacturing
- Tour of product testing area

Factory Tour Agenda

Customer Tech Center

The first stop of the LayerZero factory tour is a guided overview of the suite of LayerZero products in the Customer Tech Center. The Customer Tech center contains a replica of a data-center floor with demo units available for customers to test. Visitors can benefit from having direct access to LayerZero product experts who can demonstrate the features and functionality that guests are specifically interested in. In addition to providing product demos, the Customer Tech Center features a self-serve touch-screen kiosk, containing immersive interactive experience and videos for visitors to learn more about LayerZero solutions at their own pace.

Overview of LayerZero Products and Processes

Next, visitors will attend a guided tour of LayerZero Power Systems products and processes in our board room. This presentation contains detailed technical information about LayerZero products, as well as general information about LayerZero product features.

Tour of Product Manufacturing and Testing

The LayerZero Power Systems factory tour provides an opportunity for power distribution professionals to learn and observe how our products are built. Visitors will gain deep understanding of LayerZero’s procedures and manufacturing capabilities, as well as the methodology behind our processes.

Production varies by customer demand, and you may be touring the factory at a time when only a subset of manufacturing processes are in operation. LayerZero factory tour sections may include the following:

Laser Punch

Press Brake

Hardware Insertion

Robotic Welding

Non-Ferrous Cutting

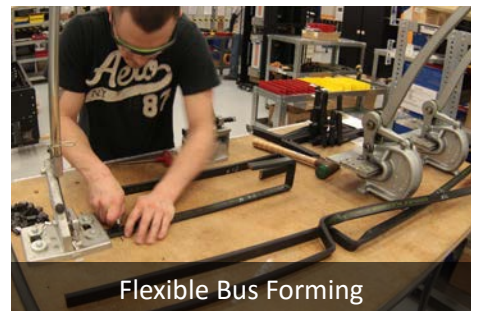

Silver Plating

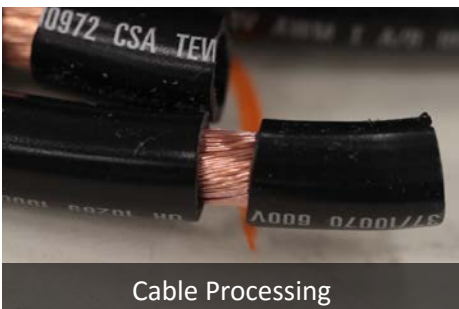

Precision Machining

Brazing

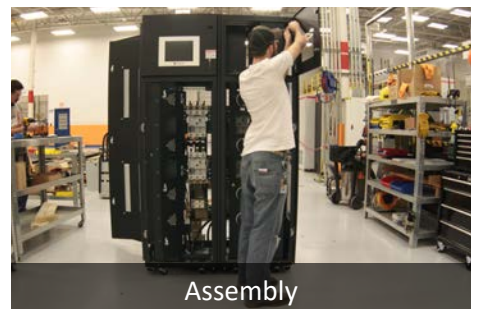

Flexible Bus Forming

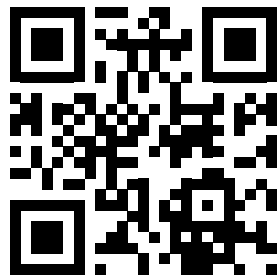

Cable Processing

Wire Processing

Assembly
